

Postal Vote Management Solution (PVMS)

OPT2VOTE'S CUTTING EDGE POSTAL VOTE MANAGEMENT SOLUTION IS AN ANSWER TO ONE OF THE ELECTION MANAGERS' BIGGEST PROBLEMS!

As the solution of choice for many of the UK's largest Local Authorities, the **OPT2VOTE** system has been successfully deployed over the last four years to scan and manage postal ballots.

The unique software solution increases the accuracy, security and efficiency of the management of returned postal votes by significantly reducing the manual effort required.

This product provides a number of added advantages including:

- ✗ Acting as a fraud deterrent
- ✗ Producing a clear audit trail of all returned postal votes

The system electronically scans and matches all postal ballot papers and accompanying Postal Vote Statements ensuring that only valid ballot papers go forward to the count. This check

helps to guarantee the complete reliability of the election count.

The Postal Vote Management Solution includes:

- ✗ Project management
- ✗ Scanning equipment and all associated hardware
- ✗ Postal Identification Matching Solution – validating returned Postal Vote Statements through automated checking of Signature and Date of Birth
- ✗ Status reports of all ballot papers
- ✗ Marked register of Postal Voters
- ✗ Detection and reporting of duplicate ballot papers
- ✗ Detection and reporting of replaced or lost ballot papers
- ✗ Additional optional reports and utilities
